### About Me

As a seasoned DevOps Engineer with 1 year of hands-on experience in designing, implementing, and optimizing CI/CD pipelines, My proficiency spans across a wide range of tools and technologies, including Docker, Kubernetes, Jenkins, Terraform, and AWS.

### Capston Project

#### ● **End to End CI/CD Implementation – Jenkins**

Implemented an end-to-end CI/CD pipeline for java-based application using Jenkins declarative pipelines. As part of the pipeline, I have implemented various stages such As Build, Unit testing, Creation of Docker Images, Deployment on Kubernetes platform using Argo CD.

#### ● **Implemented a 3-Tier Architecture – AWS**

Implemented a three tier Architecture that is highly available and scalable using Terraform and deployed the application on Ec2 Instances using the User Data script.

#### ● **AWS Components Involved:**

VPC, Route53, ELB, EC2, S3, NAT, API Gateway

#### ● **Ansible Playbook**

**Objective:** The primary goal of this Ansible playbook is to automate the deployment and configuration of a web application across multiple servers in a distributed environment.
